

In this activity, we will add together five single-digit numbers.

**Example**

Find the total of these five single-digit numbers.

$$2 + 6 + 5 + 8 + 2 =$$

**Answer**

The order in which you add numbers is not important, but we can look at ways that make it easier to add all the numbers together.

$$2 + 6 + 5 + 8 + 2$$

Look for pairs that add to 10.

Here, the final  $8 + 2 = 10$

$$\text{The } 6 + 5 = 11$$

So, we have  $2 + 11 + 10$

which is  $13 + 10 = 23$

The answer is **23**

In this activity, we will look for easy ways to add the numbers together.
