Fri	4	11	18	25	
Sat	5	12	19	26	
Sun	6	13	20	27	

A calendar shows the days and dates of each month of the year.
This changes every year.

Above, is an example showing the days and dates in the month of **August** one year.
The weekdays are shown in black and the weekends in red.

Look at the type of questions we might need to answer, using a calendar.

Join 50k+ parents who have used EdPlace to access our 11k+ National Curriculum aligned English, maths and science activities. Designed and created by qualified teachers, to support your child's education - covering KS1, KS2, KS3, SATs, GCSE and the 11 plus.

Example 1

What day is the first day of the month?

Answer

The first day of the month is shown by the number 1 on the calendar. We can see that the number 1 appears on the row of Tuesdays.

So, the first day of this month is Tuesday 1st August.

Example 2

What day of the week is the 17th of August?

Answer

To find which day of the week a date falls on, find the number and check the name of the row by reading across the calendar to the left.

The number 17 is in the row labelled Thursday.

So, the 17th of August falls on a Thursday.
