

This activity is about addition sums with carrying.

Example

Add the numbers together.

$$\begin{array}{r} 3957 \\ + 1724 \\ \hline \end{array}$$

Answer

We add in columns and carry if necessary. Start with the ones column and remember to add on any numbers that are carried from the previous column.

$$\begin{array}{r} 3957 \\ 1724 + \\ \hline 5681 \\ \text{\color{red}1} \quad \text{\color{red}1} \end{array}$$

So the answer is **5,681**

Does that all make sense?

Let's give it a go!
